Hydrometallurgy, 33 (1993) 389–390
Elsevier Science Publishers B.V., Amsterdam

Contents Vol. 33

Vol. 33 Nos. 1–2

Separation of gallium and indium by supported liquid membranes containing 2-bromodecanoic acid as carrier: design of supported liquid membrane module based on batch permeation experiments
M. Teramoto, A. Kariya, T. Yonehara, M. Tokunaga, N. Ohnishi, H. Matsuyama and Y. Miyake 1

Gold and silver extraction from Hellyer lead–zinc flotation middlings using pressure oxidation and thiourea leaching
W.J. Bruckard, G.J. Sparrow and J.T. Woodcock 17

Selectivity aspects of the extraction of gold from cyanide solutions with ion exchange resins
P.A. Riveros 43

Membrane extraction of mercury (II) and silver (I) by bis(di(2-ethylhexyloxy)thiophosphoryl)disulfide
L. Bromberg, I. Lewin and A. Warshawsky 59

Electro-reductive stripping of vanadium in solvent extraction process for separation of vanadium and molybdenum using tri-n-octylmethylammonium chloride
T. Hirai and I. Komasawa 73

Kinetics of palladium (II) extraction with N,N-dioctylglycine
Y. Baba, M. Iwasaki, K. Yoshizuka and K. Inoue 83

Comparative study of mono(n-octyl)phosphinic and di(n-octyl)phosphinic acids as metal extractants
M. Martinez, N. Miralles, A.M. Sastre and C. Herranz 95

The kinetics of zinc extraction in the di(2-ethylhexyl) phosphoric acid, n-heptane–$Zn(ClO_4)_2$, $HClO_4$, H_2O system using the rotating diffusion cell
D.W.J. MacLean and D.B. Dreisinger 107

Electrochemical aspects of zinc sulphide leaching by *Thiobacillus ferrooxidans*
W.K. Choi, A.E. Torma, R.W. Ohline and E. Ghali 137

Mass transfer rates in an electrochemical cell
T. Subbaiah, S.C. Das and R.P. Das 153

Kinetics and mechanism of reductive dissolution of zinc ferrite in H_2O and D_2O
F. Elgersma, G.J. Witkamp and G.M. Van Rosmalen 165

Kinetics of conversion of galena into lead carbonate in ammonium carbonate solution in the presence of cupric ion
Y.-J. Gong and J.-Y. Chen 177

Processing of ammoniacal solutions containing copper, nickel and cobalt for metal separation
K.C. Nathsarma and P.V.R. Bhaskara Sarma 197

Effect of ammonium salts on the extraction of copper using Hostarex DK-16
K.S. Rao and P.K. Sahoo 211

Selective precipitation stripping process for lanthanides
S. Zielinski and A. Szczepanik 219
Hydrodynamic characteristics of solvent-in-pulp processing
J.A. Golding and D.W. Koren 227
The extraction of sulphuric acid by some binary extractants
B.K. Tait 245
Meeting Announcements 252

Vol. 33 No. 3

Research papers
Iron control in nitrate hydrometallurgy by (auto)decomposition of iron(II) nitrate
G.V. Weert and Y. Shang 255
Iron control in nitrate hydrometallurgy by autoclave hydrolysis of iron(III) nitrate
Y. Shang and G.V. Weert 273
Selective leaching of zinc from mechanically activated complex Cu–Pb–Zn concentrate
K. Tkáčová, P. Baláž, B. Mišura, V.E. Vigdergauz and V.A. Chanturiya 291
Incorporation of zinc in ferrous sulfate monohydrate
F. Elgersma, G.J. Witkamp and G.M. Van Rosmalen 301
Incorporation of zinc in continuous jarosite precipitation
F. Elgersma, G.J. Witkamp and G.M. Van Rosmalen 313
Alkaline decomposition–cyanidation kinetics of argentojarosite
A. Roca, F. Patiño, J. Viñals and C. Núñez 341
The sulfuric acid processing of rare earth concentrate with high calcium content: an attempted simplified mathematical description
D.S. Todorovsky, M.M. Milanova, N.L. Minkova and V.A. Diakovich 359
The performance of a 500 amp rotating cylinder electrode reactor. Part 3: Methods for the determination of mass transport data and the choice of reactor model
F.C. Walsh 367
Meeting Announcements 387
